

News from Mrs. Siedjak

Stocker Elementary

Conference Follow up

It was so nice to see everyone during conferences. Thank you so much for coming in to visit and talk about your child. Some parents were given information about summer school. If you received information, please fill out the forms and return them to Stocker as soon as possible. You want to insure that your child gets a "spot" at our school. Also, I talked with many parents about using the Stocker Bookmark page for extra practice at home. Please take some time to go to the bookmark page with your child. There you can explore all the educational options that are at your fingertips! One program that is very helpful is the IXL site. Your child can pick from grades 3 - 5 to practice math skills. Another program is Moby Max which has a great reading and math program that individualizes the work for each child. There are so many more options for your child to practice skills and help to insure that they are getting ready for the state and school testing. Thanks for all of your support. I really appreciate it!

Social Studies

Our Wisconsin Unit continues into May. Please check with your child about their current assignment. A reminder about when the assignment is due can be found on the back of the purple communication folder. The due date is always a Wednesday and your child has one week to complete the work. These week long assignments help your child learn how to plan out when to do their work in order to have it turned in on time.

Math

Fractions are our current focus in math. We are learning about equivalent fractions, comparing fractions, adding and subtracting fractions, multiplying fractions, word problems with fractions, and finally fractions of problems. Any assistance with homework is greatly appreciated.
